

Standing Seam Custom Shape

<https://www.euramaxlab.com/paneel-types/roof-panels/standing-seam-3>

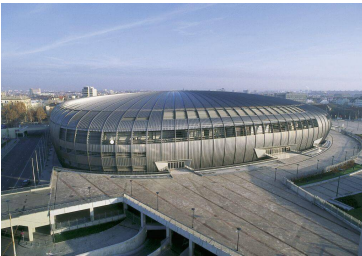

Custom shapes and designs have become available over the last decade by a small number of suppliers. Convex, concave, elliptically or hyperbolically curved standing seam profiles open up a whole variety of fascinating options for creating stunning architectural designs.

Profiles are available for both 50 mm and 65 mm high seams and can easily be combined with straight panels.
