

Entel Headquarters Santiago de Chile - Sabbagh Arquitectos

<https://www.euramaxlab.com/projects/entel-headquarters-santiago-de-chile>

Architect: Sabbagh Arquitectos
Location: Santiago de Chile, Chile
Sector: Commercial
Manufacturer: Hunter Douglas

This prestigious project includes a 23 floor corporate office building for Entel, a leading telecommunication company based in Santiago de Chile. Sabbagh Arquitectos, a renowned architect in Chile, had a clear idea since the very beginning of the project: the false ceilings should be aesthetically great at daylight and make the building appearance spectacular at night.

To realize this idea AluNatur Bright Brushed was selected. AluNatur, a transparent coating, highlights the natural beauty of aluminium. The perforated single skin profiled panels have a total surface of 23.750 m².
