

Scandic Flesland Airport Hotel - Bergen - LINK Arkitektur

<https://www.euramaxlab.com/projects/scandic-flesland-airport-hotel-bergen>

Architect: LINK Arkitektur
Location: Bergen, Norway
Sector: Hotel
Manufacturer:

The new Scandic Flesland Airport Hotel consists of 300 hotel rooms and two congress halls of 1.000 and 475 square meters and 19 additional conference rooms. The primary function will be as a conference hotel. Designed by LINK Arkitektur, the hotel offers a modern and luxurious touch. The facade consists of golden, faceted shingles that are a modern version of a widely used Nordic building technique.

From the foyer, the bar and restaurant extend two floors. Inside balconies give pleasing views, and light flows through the rooms through the glass facade and overhead lighting. The building also has a large roof garden terrace.
